Level 7 Qualifications

Summary and course overview

Who are these courses for?

These qualifications provide a wider understanding of process safety at Board and Senior Management level, especially for those who may not be from a technical background.

How does it work?

Each course is broken down into units, some are mandatory others are optional. Once both Certificates have been successfully completed, candidates then qualify for a Level 7 Diploma.

What type of learning methods are used?

A mixture of presentations, workshops and directed learning.

How will it be assessed?

Progress will be monitored and measured through professional discussion, learner statements, witness statements, questions and answers, observation, work product and viva voce.

Level 7 Qualifications

Level 7 Certificate in Understanding Continuous Improvement in Process Safety

This part of the Level 7 Diploma covers understanding the business case for process safety; leadership and culture; and effective, compliant and sustainable process safety.

Besides the four mandatory units, participants in the course need to select one optional unit. If your company has more than one entrant, this allows you to gain a wide spread of skills as each person can choose a different option.

Mandatory Units

Unit Name

Understand the business case for Process Safety Management

Understand Compliant and Sustainable Process Safety

Understand Effective Process Safety Management

Understand Leadership and Culture for Process Safety Management

Optional Units

Unit Name

Understand Commitment to Process Safety Management

Understand the impact of Major Accident Hazards and Risks on Process Safety Management

Understand a Risk-based Approach to Process Safety Management

Understand Best Practice and Deficiency Correction to Improve Process Safety Management
